 (435) 256 - 1964

 Sandy, Utah

“He has an eye for design and deeply knows many of the technologies that designers use, including HTML and CSS. He is also a valuable backend and React developer. He has an incredible understanding and aptitude for JavaScript. Frank is one of the very best full stack developers/designers I know. He would be helpful on any team.”

– Eric Jones

V School Instructor / Mentor

SKILLS

FRONT END DEVELOPMENT 7+ Years

Javascript ♦ Typescript ♦ React, NextJS, Angular, ThreeJS, React Three Fiber ♦ React Testing Library, Karma, Jest ♦ Tailwind ♦ NodeJS ♦ Express ♦ Mock Service Worker ♦ Webpack ♦ Vite

LIFETIME PRODUCTS | React, React Testing Library, SCSS

Front End Developer and UX / UI Designer | December 2020 – October 2021

ULTRADENT PRODUCTS | React, Typescript, jQuery, Webpack

Front End Developer | May 2018 – April 2020

PROJECTS

Popshop. | React/NextJS, Tailwind, Stripe

Popshop was an idea I have to help food popups create great checkout experiences for their customers, and get their customers to pick up orders at the time of their choosing with ease.

[Popshop Style Guide](#)

[Popshop XD Prototype](#)

Magic The Gathering Valuator | Tauri

A Magic The Gathering card Valuator built in Tauri, and NextJS. [Tauri](#) is a new app construction toolkit that lets you build software for all major desktop operating systems using web technologies similar to React Native.

[Live Link](#)

CnCNet Map Browser | React, Vite, Django

Building the Front End of a community map browser for the Command & Conquer franchise, with an emphasis on Red Alert 2: Yuri's Revenge. I never played the games, but the community needed a Front End Developer, so I decided to help my friend that's leading the backend of the project.
